Education

Canara Engineering College — **Mangalore, Karnataka**
Bachelor of Engineering in Computer Science and Design — 2022 – 2026
CGPA: 8.27

Himalaya PU College — **Ankola, Karnataka**
Class XI and XII (Science) — 2020 – 2022
Percentage: 87.13%

Technical Skills

Programming Languages: Python, JavaScript
AI/LLM Technologies: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering
Backend Technologies: Flask, REST APIs, MySQL
Frontend Technologies: HTML, CSS, JavaScript
Tools & Platforms: Git, GitHub, Postman, VS Code, Figma

Experience

Intern, BigQuery Database — **Bangalore, Karnataka**
Sumana Embedded Technologies — May 18, 2025 – November 28, 2025

- Worked on structured data analysis using Google BigQuery for an IoT data ingestion use case.
- Developed SQL queries involving joins, filtering, grouping, and aggregations.
- Performed data cleaning, validation, and consistency checks before reporting.
- Optimized query performance by minimizing scanned data and selecting required columns.
- Generated query-based insights used for internal monitoring and reporting.

Projects

Study Material Distribution Platform — React.js, Flask, MySQL 2025

- Designed and implemented a full-stack web platform to manage and distribute academic study materials.
- Developed secure RESTful APIs using Flask for authentication, authorization, and content access.
- Designed and implemented normalized MySQL schemas for users, roles, subjects, semesters, and documents.
- Implemented role-based access control to ensure secure separation between admin and student users.
- Integrated Google Drive API for document storage and metadata management.
- Performed functional testing and API testing using Postman to validate system behavior.
- Deployed backend services on Google Cloud Run and frontend on Firebase Hosting.

Weather Forecasting Website — HTML, CSS, JavaScript 2024

- Designed and implemented a responsive client-side web application for real-time weather visualization.
- Integrated OpenWeather API to fetch live weather data based on user-entered city names.
- Implemented input validation to handle invalid locations and prevent incorrect API requests.
- Added error handling for failed API responses and network-related issues.
- Performed manual testing to validate UI behavior across different screen sizes and browsers.
- Optimized API usage and UI updates to improve performance and user experience.

Courses and Certifications

- Python Programming — Coursera
- Programming with JavaScript (Meta) — Coursera
